One can keep the body in shape when he or she has the straight pelvis and the straight backbone.

Is my pelvis normal?

99% of people have the crooked and cracked pelvis

Is your body shape beautiful enough?

If you have the crooked and cracked pelvis, it might ruin your body shape.

Beauty Exercise Equipment will help you straighten the pelvis and keep the body in shape.

Greetings

How are you doing?

According to medical studies, 99% of people have the crooked and cracked pelvis in the wake of a child birth or sex life while suffering various unknown symptoms including a back pain, visceral obesity, bipbone neuralgia and drooping buttocks.

"The pelvis is surrounded by hip bones, and the urinary organs including the bladder, the urethra, the womb, the vagina and the rectum are concentrated. The pelvis has been relatively underestimated among the five viscera and the six entrails (of gall bladder, stomach, small and large intestines, the paunch, the bladder and the bowels)

If one does not take good care of the pelvis, he or she might have a serious problems later on. One of the most representative symptoms is a back pain. There are people who suffer a serious back pain without having a herniated disc.

Men might suffer such sexual dysfunction as impotence, and women might experience incontinence of urine. Such anal diseases as piles are related to the weak pelvis in a wider aspect.

In order to free oneself from these diseases, one needs to keep his or her pelvis strong in a daily life."

- A medical reporter

DreamAir Medical recognizes the importance of the pelvis and develops and manufactures products with aims to correct the pelvis and strengthen pelvis muscles.

The company was established in 1999, and since then, it has grown into a beauty exercise equipment specialist that manufactures various types of beauty exercise equipment.

In addition, the company is equipped with the entire production process system ranging from PCB design, control, parts assembly, manufacture and packing to finished products.

The product was researched and developed to generate an excellent effect on the human body based on accurate clinical tests for people who want to keep their health and pelvis strong.

It is an original and functional product that pressures the pelvis that has been crooked and cracked in the wake of a child birth and bad habits to correct it in a pneumatic way while being effective in far infrared ray heating, beauty exercise and message on the perineal region.

It is used in many hospitals, physical therapy centers, skin care shops and diet shops, and individual consumers also use them at home. It is time for you to experience our product.

You will experience a great deal of change in your body shape.

Thank you.

History & Certifications

- 1999 . 07 Established the company
- 2004 . 04 Released Beauty Exercise Equipment DA-3000
 - 08 Acquired DreamAir Medical
 - 09 Established a plant
 - 12 Received Silver Award in 2004 Seoul International Invention Exhibition
- 2005 . 07 Registered a utility model on a sitz bath beauty exercise equipment (No. 390059)
 - 11 Trade Business Registration Certification (NO:30423990)
 - 12 Received Bronze Award in Korea Patent Technology Competition
- 2006 . 04 Registered a utility model on a prostate vibration massage device (No. 20-0413567)
 - 04 Released DA-9000, a beauty exercise pressure belt
 - 05 Registered a beauty exercise pressure belt design
 - 05 Registered "Hipster", the trademark of a beauty exercise pressure belt
 - 07 Registered a utility model on a beauty exercise pressure belt (No. 20-0422634)
 - 10 Registered a patent on a beauty exercise pressure belt (No. 10-064282)
 - 12 Received Gold Prize in 2006 International Patented Inventions Exhibition
- 2007 . 04 Released Beauty Exercise Equipment DA-7000
- 2008 . 02 Exported DA-9000 to Japan
 - 12 Received Silver Award in 2008 International Patented Inventions Exhibition
- 2009 . 02 Exported DA-7000 to Japan

DA-7000

Beauty Exercise Equipment

Differences of DA-7000 from other models

1. It is similar to a sofa for one person and feels stable and comfortable.
2. It is the highest quality model and mostly used in shops or at home.
3. It can be used in a pelvis exercise, a backbone exercise, far infrared rays and vibration on the perineal region.
4. It uses a large air bag that applies pressure on a wider area.
5. It uses a large motor and applies pressure at a rapid speed.
6. It uses a steel frame to prevent the product from cracking apart at a time of applying pneumatic pressure.
7. As it has a pressure sensor, appropriate pneumatic pressure is applied according to a body type.

Product name	Beauty Exercise Equipment
Model name	DA-7000 DC Adapta
Rated voltage	Input : 100~240V 50-60Hz Output : 12.0V = 5.0A
Power consumption	33W
Weight	20Kg
Product Size	60X61X73cm
Box Size , weight	63X64X74cm, 25Kg

Effect of product DA-7000

Pelvis Exercise

The pelvis can be said as the axis of our body that supports the two legs below it. Improper posture and life habits make it widen and twisted, causing all internal organs to go out of the place from their proper place.

It can lead to many diseases, including pain in the lower back, sciatica, shoulder pain, indigestion, and urinary incontinence.

This product is an exercise device that strengthens the muscles by repeating the action of pushing the twisted pelvis to its proper place using air pressure.

Waist Exercise

The backbone acts as our body's pillar and is directly connected to the brain, delivering signals to each of the internal organs, or to the arms and legs.

Spinal signals go through the backbone, and as such it plays a very important role for our body.

This product is very effective in relaxing the backbone muscles by pushing the backbone with air pressure, while sitting and correcting the backbone.

Far infrared lamp(The ceramics ball)

Far infrared lamp(The ceramics ball) effect has the far infrared ray which is radiated by the yellow soil to penetrate deep into our body through the anus. The effect is widely verified to dissolve heavy metals and waste matter, preventing obesity in the abdominal region and adult diseases.

Massage on the perineal region

The product is a massage device that is effective in piles, a body chill and incontinence of urine based on heating, massage and a sphincter exercise.

One can control urination as the bladder and urinary sphincter reflexively contract the entry of the bladder preventing urine from leaking.

If one has a weak urinary sphincter, he or she could be forced to urinate regardless of time and places.

Various clinical tests by medical specialists have confirmed that these symptoms can be improved through a heating massage on the perineal region and a sphincter exercise.

A sphincter exercise is a must for all men and women.

DA-3000

Differences of DA-3000 from other models

1. It looks stylist and is lighter, so it is easy to transport.
2. It is high-end type and used in shops and at home.
3. It can be used for a hip exercise, far infrared rays and vibration on the perineal region.
4. It is reclinable and can be used when one is lying.
5. It uses a medium-sized air bag and a medium-sized motor.
6. It uses a steel frame to prevent cracking at a time of applying pneumatic pressuring on the hip.
7. It has a pressure sensor that puts pneumatic pressure according to body shapes.

Product name	Beauty Exercise Equipment
Model name	DA-3000 DC Adapta
Rated voltage	Input : 100~240V 50-60Hz Output : 12.0V = 5.0A
Power consumption	33W
Weight	10Kg
Product Size	55X50X45cm
Box Size	61X56X37cm

Beauty Exercise Equipment

Effect of product DA-3000

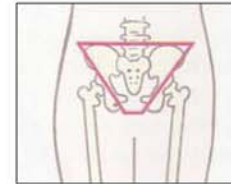

1. Pelvis Exercise
2. Far infrared lamp (The ceramics ball)
3. Massage on the perineal region

Reasons for the crooked and cracked pelvis

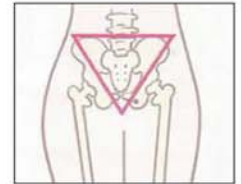

- Bad posture and habits
- A lack of exercise
- Poor post-natal care
- A wallet or a mobile phone kept in a back pocket
- Long hours of driving

Symptoms and diseases caused by the crooked and cracked pelvis

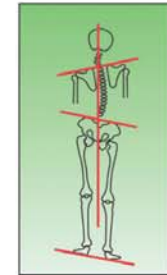

- Obese buttocks and lower part of the body
- O or X-shaped legs
- Period pains and irregular menstruation
- Difference in the length of both legs
- Back pains and knee pains
- Unpleasant feelings caused by pressure on the womb and the ovary
- Skin trouble

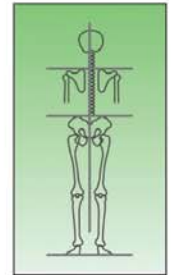

The changed pelvis

The normal pelvis

The change backbone

The normal backbone

DA-9000

Beauty Exercise Equipment

Differences of DA-9000 from other models

1. It has minimized the size and the weight.
2. It is a distribution model and mostly used at home.
3. It can be used for a pelvis exercise and vibration on the perineal region.
4. It has two auxiliary belts that are effective in correcting O-shaped legs.
5. It can be applied to the desired part of the pelvis and used when one is lying.
6. It has a belt control clip, so it can be used according to body shapes.
(It can be used through the control of size according to the size of the hips.)

Product name	Beauty Exercise Equipment
Model name	DA-9000
	DC Adapta
Rated voltage	Input : 100~240V 50-60Hz Output : 12.0V = 1.2A
Power consumption	13W
Weight	2Kg
Product Size	34X27X10cm
Box Size	36X28X10cm

Effect of product DA-9000

1. Pelvis Exercise
2. Massage on the perineal region

POINT1

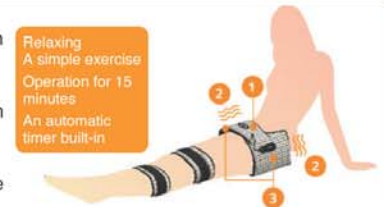

It is an adjustable belt that fits all body types. It generates an optimal effect all the time.

POINT2

A vibrator is built in where the hips touch, and its stimulation relaxes muscles on the pelvis.

POINT3

An air bag inside the both sides of the belt puts pressure on the pelvis correcting the crooked pelvis.

Relaxing
A simple exercise
Operation for 15
minutes
An automatic
timer built-in

With a remote-controller
Simple manipulation

- 1 Airbag <Weak> operation
- 2 Airbag operation
- 3 Vibration
- 4 Airbag button
- 5 Vibration button

Airbags on both sides pressure the pelvis

Muscles on the pelvis are relaxed through vibration.

Are you still worried about O or X-shaped legs?

The fundamental reason for O or X-shaped legs is the crooked or cracked pelvis.

If the pelvis is crooked or cracked, it puts pressure on a hip joint and breaks the balance of the body. If it continues for a long time, it eventually causes O or X-shaped legs.

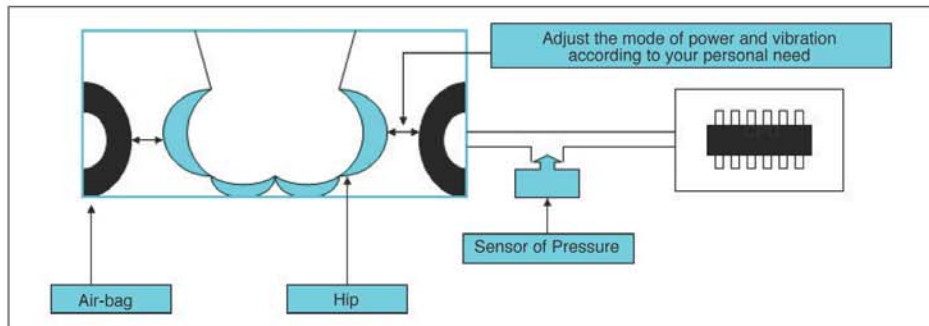

The O or X-shaped legs do not look good, and more importantly, if they are not corrected, they have an adverse effect on the knees, the backbone and the body in general causing growth restriction and various adult diseases.

The pelvis correction belt can be used when one is sitting or lying, and airbags on both sides correct the crooked and cracked pelvis while resolving X or O-shaped legs.

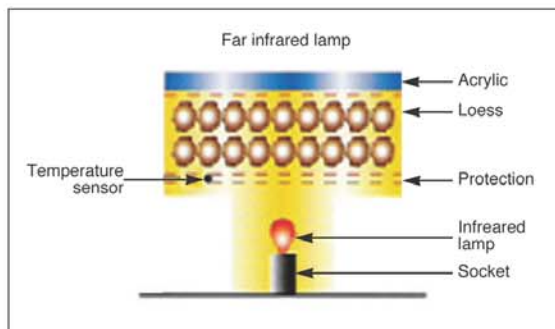

A notable feature of Beauty Exercise Equipment

Product(Beauty Exercise Equipment) is designed with the most advanced mechanical brain.
Product(DA-3000, DA-7000) detects the difference of body (hip) types so that it corrects each user's pelvis in the most optimal manner.
It corrects the subject pelvis through a series of repeated movements of powerful four (4) air bags, when you are sitting or lying on a "Beauty Exercise Equipment".

Steel frame support: When airbag pressures pelvis, it functions as a support for pelvis not to be pushed off in both sides. It is a solid product with strong pressure.

The surface of loess is like a honeycomb with a number of spaces of a multiple layered structure.
As the sponge-like holes absorb and store plenty of far infrared ray, if heated, they emit the heat and stimulate molecular motion of another object.

How to use

How to use by the number of days

1) 1 to 14 days (about 2 weeks)

Users might feel a little pain or have benumbed feet at first.

It is caused as pneumatic pressure is applied to muscles that are not used in daily life, so it is not worrisome.
As the pelvis is contracted and muscles are strengthened through a pelvis exercise, they gradually disappear.
(Set it as "Weak" and use it twice a day)

2) 15 to 30 days (about 1 month)

The pelvis is slowly contracted, and muscles of the pelvis begin to be strengthened.

It can be set as "Weak" and "Medium Strength" Set it as "Weak" or "Medium Strength" and use it twice a day.

3) 31 to 100 days (about 3 months)

The pelvis and its muscles begin to be strengthened, and it may be set as "Strong" It is allowed to use it twice or more a day.

Set it as "Medium Strength" or "Strong" and use it twice or more a day in the morning and at night.

If it is continuously used for 60 days or longer, the size of the pelvis and the vagina is expected to change.

In addition, O-shaped legs can be corrected, and a beautiful body shape and hip lines can be restored.

Check the reduced size of the pelvis by trying on clothes that you used to wear before.

4) After 100 days (after about 3 months)

One can feel changes in the body.

If one stops using it, the pelvis can be crooked or cracked again in the wake of a child birth, sex life, menstruation and a bad posture.

After a continuous pelvis exercise, one will be able to feel a great deal of change in a body shape.

5) After 1 year

Although one reduces the frequently of use, it is possible to prevent the pelvis from being crooked or cracked and maintain beautiful hip lines and body shape.

However, as the pelvis is crooked or cracked again after a sex, a child birth and menstruation, make sure to use it on a continual basis.
